Re: Immunocompromised student

Dear Parents/Carers,

I write to inform you that a student in our school is currently receiving treatment which results in a lowered immune system, which means the student is susceptible to increased risk of infection. As the student is not contagious but has a chronic illness, it is important that he/she participates actively in a regular school program without any limitations.

A major concern is that if this student develops chickenpox, measles, COVID-19, whooping cough, influenza or another serious virus, he/she could become seriously ill. Therefore, I seek your cooperation in limiting the risk.

If your child has or may have one of these infectious illnesses, I would ask that you please:

1. Do not send them to school.
2. Notify the school Principal as soon as possible.
3. Take them to your GP or medical centre to confirm diagnosis if possible.

Yours sincerely

Chris Hollis
Rel. Principal
